

MultiSPOT™

Combination Wet-Dry Spotter

Safely Removes More Stains™

Don't waste time with trial and error spotting. Get MultiSPOT!

Stains can be water-soluble (wet), solvent-soluble (dry), or both. The nature of a stain is not always easy to determine, making it difficult to decide which spotter to use. When you don't know what caused a stain, don't waste time with trial and error spotting. Reach for **MultiSPOT™**; it *safely removes more stains*.

MultiSPOT is a unique soil release agent that can be used in many ways. **MultiSPOT** works as a combination wet-dry spotter for all solvents. When used on the board as a pre-spotter or post-spotter, it effectively removes a number of common stains and flushes easily with water or steam.

- **Effective Wet-Dry Spotter**

Regardless of which solvent you use, you need a safe general spotter that can attack both water-soluble and solvent-soluble stains, so you can reduce your time on the spotting board before and after cleaning. **MultiSPOT** is a new generation product that contains what you need to remove most of these unidentified and combination stains including:

- *Oily foods*
- *Cosmetics*
- *Inks*
- *Imbedded Soil and Grime*
- *Unknown Stains*

- **Versatile**

Use **MultiSPOT** for pre-spotting, post-spotting and touch-up. **MultiSPOT** can be sprayed, brushed on or applied with a spotting bottle.

- **Easy Flushing**

When used on the spotting board, simply flush out with water or steam.

- **Safe on Delicate Fabrics**

MultiSPOT is safe to use on most colors and fabrics; it is ideal for all skill levels.

- **Eco-Conscious**

All ingredients are biodegradable. Contains no Proposition 65 listed ingredients. Contains no perchloroethylene or other halogenated compounds.

Instructions For Using MultiSPOT™ Combination Wet-Dry Spotter

For Use At The Spotting Board For All Solvents

When Used As A Pre-spotter:

- Apply **MultiSPOT** directly to stain.
- Work into stain with a spatula or spotting brush.
- When soil is loosened or removed from fabric, flush with water or steam.
- Dry or level and continue with the drycleaning process.

When Used As A Post-spotter:

- Apply **MultiSPOT** directly to stain.
- Work into stain with a spatula or spotting brush.
- When soil is loosened or removed from fabric, flush with water or steam. Feather dry and finish.

*Please Note: **MultiSPOT** is safe to use on most colors and fabrics. If color fastness is questionable, test garment in a hidden area.*

*Please Note: for use instructions for **MultiSPOT** as a Pre-Treatment and Cleaning Booster for perc systems, please refer to **MultiSPOT** Technical Bulletin. For pre-treating in **DF-2000 Fluid**™, use **SPOTLess HC**™ and refer to label directions or the catalog page for use instructions.*

How to Order MultiSPOT Combination Wet-Dry Spotter
